FORECASTS OF THE INCOME OF THE GOVERNMENT FOR FISCAL YEAR

WASHINGTON, D. C., Mar. 14 .-Preliminary reports to the treasury department indicate that the government will collect \$300,000,000 in income taxes during the current fiscal year, or about two and one half times as much as during the pending 12 months, Internal revenue receipts are expected to exceed \$700,000,000, an Increase of nearly \$200,000,000.

The time for filing income returns expired March 10th. Most of the increase is due to the higher rate of taxation. Collections actually made up to the present aggregate about \$25,000,000, or \$7,000,000 more than was collected this time last year.

The government's tax of munitions will net approximately \$40,000,000, it is thought, while for the few months of the fiscal year during which the former emergency tax law was in effect, the returns will approximate \$25,000,000 on miscellaneous items affected by this tax.
